COVID 19 Guidelines for All WFCF Learning Garden Participants and Visitors

Waltham Field Community Farm looks forward to welcoming our community to the farm for healthy, safe and enjoyable experiences. WFCF has coordinated with the City of Waltham, the State of MA and the Waltham Recreation Department and received guidance from public health consultants for updating protocols to help make that happen.

Face Coverings/Masking

In alignment with the MA Department of Public Health advisement, please wear a mask when entering all indoor spaces, including the Learning Garden Shed and Cottage, office building, indoor bathrooms and distribution barn, to protect our vulnerable community members.

It is strongly recommended that those who are not fully vaccinated continue to wear masks indoors and outdoors, especially when social-distancing is difficult to maintain, and maintain a 6 ft. physical distance from others when possible.

We ask all to respect the mask wearing preferences of individuals while in this shared space.

Hand Washing & Hand Sanitizer

Hand sanitizer dispensers are available in the Learning Garden at all times, and installed at the wash station, in the portable restroom (May - October), at the barn and at the PYO station.

A portable, accessible restroom and handwashing station are located next to the Learning Garden from May October.

November through April, when possible, a handwashing station will be available in the Learning Garden. Indoor bathrooms and running water are available during program hours in the office building - Masks required for indoor spaces.

Disinfecting

All program facilities and equipment will be disinfected daily. Learning Garden and Cottage surfaces will be sanitized before each program session.
